## **Delivery programme**

| Product range         |    |   | Accessories   |
|-----------------------|----|---|---|
| Accessories           |    |   | Shunt release   |
| Accessories           |    |   | Shunt releases  |
| Standard/Approval     |    |   | UL/CSA, IEC   |
| Construction size     |    |   | NZM2/3  |
| Description           |    |   | Switches are tripped by a voltage pulse or by the application of uninterrupted voltage.<br>When the shunt release is energized, accidental contact with the main contacts of the switch during attempts to switch on is safely prevented.<br>Undervoltage releases cannot be installed simultaneously with NZMXHIV early-make auxiliary contact or NZMXU shunt release. |
| Connection type       |    |   | With bolt connection  |
| Auxiliary contacts    |    |   | without auxiliary contact   |
| Rated control voltage | Us | V | 208 - 250 V AC/DC   |
| For use with          |    |   | NZM2(-4), N(S)2(-4)<br>NZM3(-4), N(S)3(-4)  |

# **Technical data**

| Shunt release  |                  |                 |                                      |
|--|------------------|-----------------|--------------------------------------|
| Rated control voltage  | Us               | V               |                                      |
| AC   | Us               | V AC            | 12 - 440                             |
| DC   | Us               | V DC            | 12 - 440                             |
| Frequency range  |                  | Hz              | 50/60/200/400, DC                    |
| Operating range  |                  |                 |                                      |
| AC   | x U <sub>s</sub> |                 | 0.7 - 1.1                            |
| DC   | x U <sub>s</sub> |                 | 0.7 - 1.1                            |
| Power consumption  |                  |                 |                                      |
| Pick-up AC/DC  |                  | VA/W            | 2.5                                  |
| Sealing AC/DC  |                  | VA/W            | 2.5                                  |
| Maximum opening delay (response time until opening of the main contacts) |                  | ms              | 20                                   |
| Maximum duty factor  |                  | ms              | ~                                    |

# Design verification as per IEC/EN 61439

| IEC/EN 61439 design verification   |               |                               |
|--|---------------|-------------------------------|
| 10.2 Strength of materials and parts                                       |               |                               |
| 10.2.2 Corrosion resistance  | Meets the pro | duct standard's requirements. |
| 10.2.3.1 Verification of thermal stability of enclosures                   | Meets the pro | duct standard's requirements. |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat | Meets the pro | duct standard's requirements. |

| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat<br>and fire due to internal electric effects | Meets the product standard's requirements.   |
|---|--|
| 10.2.4 Resistance to ultra-violet (UV) radiation  | Meets the product standard's requirements.   |
| 10.2.5 Lifting  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions   | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances  | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections   | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors  | Is the panel builder's responsibility.   |
| 10.9 Insulation properties  |  |
| 10.9.2 Power-frequency electric strength  | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage  | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material  | Is the panel builder's responsibility.   |
| 10.10 Temperature rise  | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility   | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function   | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

### **Technical data ETIM 6.0**

Low-voltage industrial components (EG000017) / Shunt release (for power circuit breaker) (EC001023)

| Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Full load current trip (ecl@ss8.1-27-37-04-18 [AKF016010]) |   |     |                  |
|--|---|-----|------------------|
