

PROTECTION AND CONNECTION

Spare parts for motorized change-over switches

Service offering

Providing a service offering for our products guarantees that our customers will be able to minimize unwanted production stops, thus maximizing the uptime of their processes.

We can increase the value for our customers by providing a well-organized service offering and professionally trained service personnel.

Our service offering includes spare parts and spare parts kits, emergency support and component exchange.

Spare parts

To provide service in a fast and efficient way, availability of original spare parts is essential.

Having critical spare parts available can significantly reduce the down-time that is associated with maintenance and failure.

The correct use of spare parts is essential to guarantee the same ABB quality as the original product.

Original spare parts are tested based on original production standards.

A 100% compatibility of all spare parts used in switches is necessary to ensure optimum performance. This is only possible with original spare parts.

Spare parts can be ordered through Parts OnLine (www.abb.com/partsonline). Parts OnLine (POL) is a web-based system that has the following features:

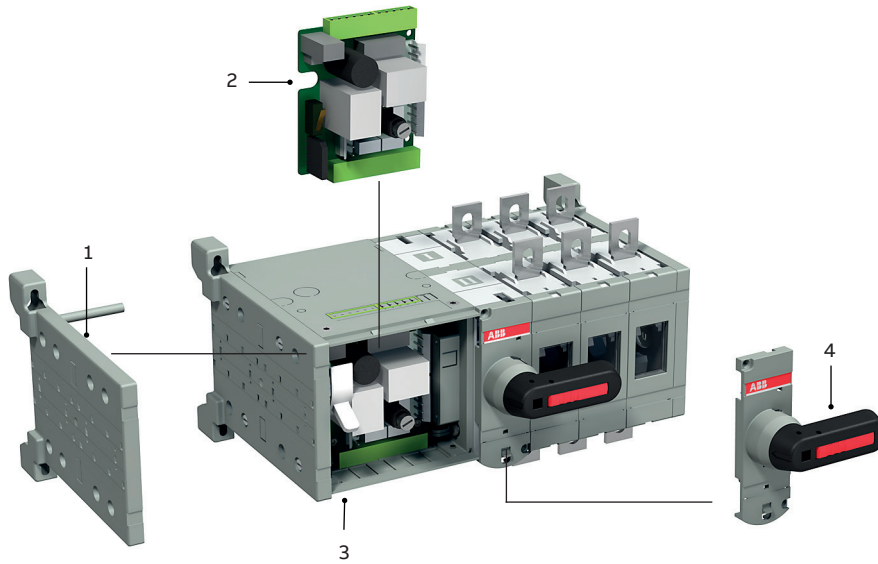

- Product information
- Stock quantities
- Order and delivery status
- Prices

Registration is necessary for some of these features.

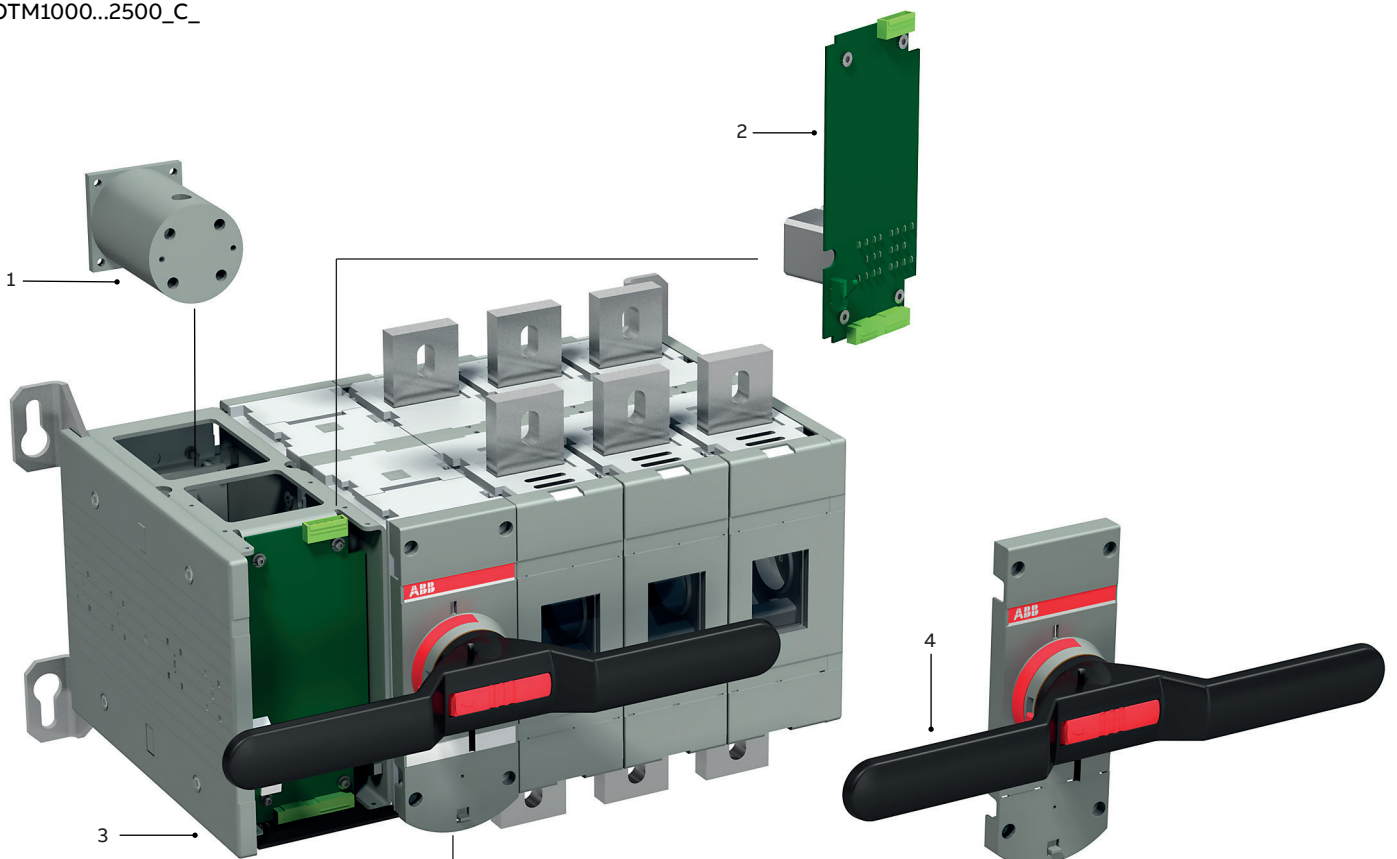

Spare parts

OTM160...800_C_

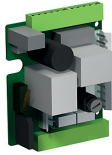

1. End plate | 2. Printed circuit board (PCB) | 3. Manual/motor selector switch | 4. Direct mounted handle

OTM1000...2500_C_

1. Motor | 2. Printed circuit board (PCB) | 3. Manual/motor selector switch | 4. Direct mounted handle
