

Product End of Life Instructions

Arc sensor with 20m connective cable

End of Life Instructions

Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
To be depolluted	1	PCB	1.9	Including all soldering parts

Product description

Manufacturer identification	Schneider Electric Industries SAS
Brand name	Schneider Electric
Product function	The arc flash point sensor are used to detect light emitted by the arc and inform the unit to activate an emergency trip. By using the optic fiber principle, these sensors have a high reaction time to indicate faults. These elements can be installed at different location within an enclosure to have a precise position, faster detection of the fault.
Product reference	REL52801

Total representative product mass	1000 g
Representative product dimensions	20000mm*25mm*20mm
Date of information release	15/08/2025

Additional information

Legal information

The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Recyclability potential

0%

The recyclability rate was calculated from the recycling rates of each material making up the product based on REEECY[®]LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the EIME database and the related PSR was taken. If no data was found a conservative assumption was used (0% recyclability).
