| p | 第四部分─急救措施 | | |
| | Section 4- First Aid Measures | | |
| | 万一接触,立即用大量的清水冲洗至少15分钟,翻起上下眼脸,直到化学的残留 | | |
| 眼睛接触 | 物消失为止,迅速就医。 | | |
| Eye contact | Flush eyes with plenty of water for least 15 minutes, occasionally lifting the | | |
| | upper and lower eyelids. Get medical aid. | | |
| 万一字钟。田士景的水冲洗至小15分钟。同时岭土污染的友物和鞋子。迅速就 | | | |
| | Remove contaminated clothes and rinse skin with plenty of water or shower for 15 minutes. Get medical aid. | | |
| Skiii Contact | | | |
| 吸入 | 立即从暴露处移至空气清新处,如果呼吸困难给予输氧,立即就医。 | | |
| Inhalation | Remove from exposure and move to fresh air immediately. Use oxygen if | | |
| | available. | | |
| 摄入 | 饮用两杯牛奶或水,如果当事人仍然清晰可以采取催吐的方法,并且立即就医。 Give at least 2 glasses of milk or water. Induce vomiting unless patient is | | |
| Ingestion | unconscious. Call a physician. | | |
| | 第五部分-消防措施 | | |
| | Section 5- Fire Fighting Measures | | |
| 燃点 | 不适用 | | |
| Flash Point | N/A | | |
| | | | |
| 自燃温度 Auto-Ignition Temperature | 不适用 N/A | | |
| | | | |
| 灭火介质 | 水,二氧化碳 | | |
| Extinguishing Media | H ₂ O, CO ₂ | | |
| 特殊灭火程序 | 自给式呼吸器 | | |
| Special Fire-Fighting Procedures | Self-contained breathing apparatus | | |
| | | | |
| 异常火灾或爆炸 Unusual Fire and Explosion | 当电芯暴露于过热的环境中时, 安全阀可能会打开 | | |
| Hazards | Cell may vent when subjected to excessive heat-exposing battery contents | | |
| 燃烧产生的危险物品 | | | |
| Hazardous Combustion | 二氧化碳、酸、氢气和氧气。 | | |
| Products | Carbon dioxide, acid, hydrogen and oxygen. | | |
| 第六部分−泄露应急处理 | | | |
| Section 6- Accidental Release Measures | | | |
| J | JULIUI J / LOUINOI IMI I LOUINO III LUUNI LO | | |

个人预防措施、保护设备和应急程序:

如果电池被泄露,让人员离开该区域直到烟雾消散。提供最大限度的通风,清除有害气体。首选的反应就是离开这个 地区并消散气体,避免皮肤和眼睛接触或吸入气体。用吸收剂清除溢出的液体然后焚烧。如果电池泄漏发生时,液体可 以用砂、泥土或其他惰性物质来吸收,污染区域应该保持通风。

Personal precautions, protective equipment and emergency procedures:

If the battery is released, remove personnel from area until fumes dissipate. Provide maximum ventilation to clear out hazardous gases. The preferred response is to leave the area and allow the vapors to dissipate, Avoid skin and eyes contact or inhalation of vapors. Remove spilled liquid with absorbent and incinerated. If leakage of the battery happens, liquid could be absorbed by using sand, earth or other inert substance and contaminated area should be ventilated meantime.

环境预防措施:

不允许产品到达排水系统或任何水源。

如果渗透进排水系统或任何水源,通知相应的部门。

不允许进入下水道/表面或地下水。

Environment precautions:

Do not allow product to reach sewage system or any water source.

Inform respective authorities in case of seepage into water course or sewage system.

Do not allow to enter sewers/ surface or ground water.

抑制和清理材料的方法:

如果电池外壳被拆除,少量电解液可能会泄漏。收集所有材料放进一个塑料容器。根据当地的法律法规来处置,避免 可溶物质讲入大地、下水道或水源。

Methods and material for containment and cleaning up:

If battery casing is dismantled, small amounts of electrolyte may leak. Collect all released material in a plastic lined container. Dispose off according to the local law and rules, Avoid leached substances to get into the earth, canalization or waters.

| 第七部分−操作处置和储存 | | | | |
|---------------------------------|---|--|--|--|
| Section 7- Handling and Storage | | | | |
| 操作处置 Handling | 禁止打开、毁坏或焚烧电池,因为电池有可能在这些处理过程中发生爆炸、破裂或泄露等事故。 禁止将电池短路、过充、强制放电或扔入火中。 禁止挤压或刺穿电池,或将电池浸入溶液中。 The battery should not be opened, destroyed or incinerate, since they may leak or rupture and release to the environment the ingredients that they contain in the hermetically sealed container. Do not short circuit terminals, or over charge the battery, forced over-discharge, throw to fire. Do not crush or puncture the battery, or immerse in liquids. | | | |
| 储存 Storage | 禁止物理或电滥用,禁止高温储存,最好将电池储存在阴凉、干燥、通风及温度变化较小的环境中。 禁止将电池接触加热设备,或将电池长时间直接暴露在阳光中。 Avoid mechanical or electrical abuse. Storage preferably in cool, dry and ventilated area, which is subject to little temperature change. Storage at high temperatures should be avoided. Do not place the battery near heating equipment, nor expose to direct sunlight for long periods. | | | |

编号/No.: BCTC/RF-BAT-007

页码/Page: 4 of 10

版本/Edition: A.3

| | 拆解、挤压、直接放入火中或 | (高温条件下,电池可能发生爆炸 | 作和燃烧。 | | | |
|-------------------------------|--|----------------------------------|----------------------|--|--|--|
| 其他要注意的防范措施 | 禁止短接或将电池正负极错误的安装在设备中。 | | | | | |
| Other Precautions | The battery may explode or cause burns, if disassembled, crushed or exposed | | | | | |
| | to fire or high temperatures. Do not short or install with incorrect polarity. | | | | | |
| | 第八部分─接触控制和个体防护 | | | | | |
| Section | 8- Exposure Controls/ | Personal Protection | | | | |
| | 设计局部排气通风或其它设计来控制粉尘、雾、烟雾和气体。 | | | | | |
| 设计控制 | Use local exhaust ventilation | or other engineering controls to | o control sources of | | | |
| Engineering Controls | dust, mist, fumes and vapor. | | | | | |
| | Keep away from heat and op | en flame. Store in a cool, dry p | lace. | | | |
| | 呼吸防护:在正常情况下不需 | 要。 | | | | |
| | 皮肤和身体防护: 在正常情况 | 记下不需要,如果处理一个裂开的 | 的或泄漏的电池需要 | | | |
| | 穿戴适当的防护服和手套。 | | | | | |
| | 手保护:如果处理一个裂开的 | J或泄漏的电池需要戴适当手套。 | , | | | |
| | 眼睛保护: 在正常情况下不需 | 。 等要,如果处理一个裂开的或泄液 | 属的电池需要戴上安 | | | |
| 个人防护装备 | 全眼镜。 | | | | | |
| Personal Protective Equipment | Respiratory Protection: Not r | ecessary under normal condition | ons. | | | |
| | • | ot necessary under normal cond | | | | |
| | | nd gloves if handling an open o | | | | |
| | Hand protection: Wear suital | ole gloves if handling an open o | r leaking battery. | | | |
| | Eye Protection: Not necessary under normal conditions, Wear safety gla | | | | | |
| | handling an open or leaking battery. | | | | | |
| 其它防护装备 | 在工作区域应该有一个立即可以使用的安全淋浴和喷水洗眼器。 | | | | | |
| Other Protective Equipment | Have a safety shower and eye wash fountain readily available in the immediate | | | | | |
| | work area. | S 1 | | | | |
| 卫生措施 | 在工作区域不得进食,饮水或吸烟。 | | | | | |
| Hygiene Measures | Do not eat, drink, or smoke in work area. Maintain good housekeeping. | | | | | |
| | 第九部分-物理和化 | | | | | |

编号/No.: BCTC/RF-BAT-007 版本/Edition: A.3 页码/Page: 7 of 10

该货物应视为非限制货物,并且必须符合包装要求IATA第65版DGR手册的特殊规定A67的指令872或IMDG CODE的特殊规定238的指令(第41-22号修正案)或《关于国际公路危险货物运输的欧洲协定》(ADR 2019第I卷)在空运或海运的货运单上应包含"Not Restricted"及特殊规定条款号。

运输方式: 空运, 海运, 铁路, 公路。

Transport information:

This goods shall be considered Not Restricted Goods and need to be complied with the requirements of Packing Instruction 872 of special provision A67 of 65th DGR Manual of IATA or special provision 238 of IMDG CODE (Amdt. 41-22) or European Agreement Concerning the International Carriage of Dangerous Goods by Road(ADR 2019 Volume I)

The words "Not Restricted" and the Special Provision number must be included in the description of the substance on the Air or Sea Waybill.

Transport Fashion: By air, by sea, by railway, by road.

测力

声 明 STATEMENT

1. 本次检测所用的测量设备的量值均可以溯源到国家计量标准。

The equipment lists are traceable to the national reference standards.

2. 检测报告未经本实验室书面批准,不得部分复制。

The test report can not be partially copied unless prior written approval is issued from our lab.

3. 报告未加盖"检测专用章"无效。

The test report is invalid without stamp of laboratory.

4. 报告无检测、批准人员签字无效。

The test report is invalid without signature of person(s) testing and authorizing.

5. 本次检测的结果仅对所检测样品有效。

The test process and test result is only related to the Unit Under Test.

6. 样品的相关信息由委托单位提供,实验室不对其真实性负责。

Sample information is provided by the customer and the laboratory is not responsible for its authenticity.

7. 无CMA标志的报告,仅供科研、教学、企业产品研发及内部质量控制目的用。

Reports without CMA mark are only used for scientific research, teaching, enterprise product development and internal quality control purposes.

8. 本实验室的质量体系符合ISO/IEC17025标准的要求。

The quality system of our laboratory is in accordance with ISO/IEC17025.

9. 如对本报告有异议,可在收到报告后15 天内向本单位申诉,逾期不予受理。

If there is any objection to report, the client should inform issuing laboratory within 15 days from the date of receiving test report.

| | H400 | Aquatic Acute 1 |
| | H410 | Aquatic Chronic 1 |

Adverse physicochemical, human health and environmental effects No additional information available

2.2 Label Elements

Labelling according to Regulation (EC) No. 1272/2008 (CLP)

Hazard Pictograms (CLP)

GHS05

GHS07

GHS08

GHS09

Signal Word (CLP) - DANGER

| | H302 | Harmful if swallowed |
|-------------------|--------|--|
| | H314 | Causes severe skin burns and eye damage |
| | H315 | Causes skin irritation |
| | H318 | Causes serious eye damage |
| Hazard Statements | H360D | May damage the unborn child |
| (CLP) | H360Fd | May damage fertility. Suspected of damaging the unborn child |
| | H362 | May cause harm to breast-fed children |
| | H372 | Causes damage to organs through prolonged or repeated exposure |
| | H400 | Very toxic to aquatic life |
| | H410 | Very toxic to aquatic life with long lasting effects |

| December | P201 | Obtain special instructions before use |
|-----------------------------------|----------------|--|
| Precautionary Statements (CLP) | P202 | Do not handle until all safety precautions have been read and understood |
| | P260 | Do not breathe dust/fume/gas/mists/vapours/spray |
| | P264 | Wash Thoroughly after handling |
| | P270 | Do not eat, drink or smoke when using this product |
| | P273 | Avoid release to the environment |
| | P280 | Wear protective gloves/protective clothing/eye protection |
| | P303, 361, 353 | IF ON SKIN (or hair): Take off Immediately all contaminated clothing. Rinse SKIN with water [or shower]. |
| | P301, 330, 331 | IF SWALLOWED: Rinse mouth. Do NOT induce vomiting |
| | P304, 340 | IF INHALED: Remove person to fresh air and keep comfortable for breathing. |
| | P305, 351, 338 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing. |

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 *

| Document: | SDS 01 |

| Page: | 3 of 12 |

2.3 Other Hazards

| VRLA Battery | Mechanical | VRLA Batteries can be heavy. Correct manual handling techniques and/or mechanical lifting aides (e.g. Fork Lift Truck) must be used. |
|--------------|------------|---|
| | Electrical | VRLA Batteries can contain large amounts of electrical energy which can give very high discharge currents and severe electrical shock if the terminals are short circuited. |
| | Chemical | The VRLA Battery presents no chemical hazards during the normal operation provided the recommendations for handling, storage, transport and usage are observed. VRLA Batteries emit hydrogen gas which is highly flammable and will form explosive mixtures in air from approx. 4% to 76%. This can be ignited by a spark at any voltage, naked flames or other sources of ignition. If the battery is broken and the internal components exposed, hazards may exist which require careful attention. |

SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

| Substa | ances pro | esent in the produ | ıct | | | |
|-------------------|-----------|--|--|-----------------------------------|--------------------------------|---------------------|
| Compo | onents | Classification according to Regulation | Substances | Approximate % (W/ _W) | Chemical Symbol | CAS No. |
| | | (EC) No. 1272/2008 (ELP)¹ | | Battery | | |
| Plate G | Grid | | Metallic Lead | 40 to 50 | Pb | 7439-92- |
| | | | Calcium | < 0.1 | Ca | 7440-70-2 |
| | | | Tin | < 1 | Sn | 7440-31- |
| Active | | H360 | Lead Monoxide | < 0.1 | PbO | 1317-36- |

| | | H400 H410 | Barium compound | < 2 | Ва | 7440-39- |
| Battery | - | H314 | Dilute Sulphuric Acid | 10 to 20 | H ₂ SO ₄ | 7664-93- |
| Case Materia | al | | Standard Grade, UL94:HB ABS (Acrylonitrile-Butadiene-Styrene Copolymer) | 5 to 10 | | 9003-56- |
| | | | Flame Retardant (FR) Grade, UL94:V0 • ABS (Acrylonitrile-Butadiene-Styrene Copolymer) | 5 to 10 | | 9003-56-9 |
| | | | Brominated aromatic compound. Antimony trioxide | < 1.2% < 0.3% | | 79-94-7 1309-64- |
| Separa Materia | | | Absorbent Glass Matt (AGM) Separator (100% Borosilicate Glass Microfibre) | 1 to 3 | | 65997-17 |

Inorganic lead and battery electrolyte (Dilute Sulphuric Acid) are the main components of VRLA batteries. Other substances may be present but in small amounts dependant on battery type. Contact GS Yuasa Battery Manufacturing UK Ltd for further information.

SECTION 4: FIRST AID MEASURES FOR ACUTE EXPOSURE

This information is of relevance only if the VRLA Battery has suffered damage, is broken and persons have direct contact with the internal components.

| 4.1 | Description of first aid measures | | |
|--|-----------------------------------|---------------|--|
| | Components | | Action |
| | Plate Grids and Active materials | Inhalation: | Remove the person from exposure to fresh air. Seek advice from a medical doctor |
| | | Ingestion | Wash out mouth with water and give plenty of water to drink. Do not induce vomiting. Seek advice from a medical doctor |
| Seek medical advice if pain or rash doe Eye Contact: Immediately irrigate with eyewash sole the eyelids apart. Then take the perso Self-protection Eye protection (safety glasses or face) | | Skin Contact: | Wash off with plenty of water and soap to prevent accidental ingestion or inhalation Seek medical advice if pain or rash does not reduce |
| | | Eye Contact: | Immediately irrigate with eyewash solution or clean water for at least 10 minutes, holding the eyelids apart. Then take the person to hospital without further delay |
| | | | Eye protection (safety glasses or face shield), and heavy-duty gloves are required. In case of inhalation, a face mask or respirator may be required. |
| | Battery Electrolyte | | SPEED IS ESSENTIAL - OBTAIN IMMEDIATE MEDICAL ATTENTION. |
| | | Inhalation: | Remove the person from exposure to fresh air. If the person continues to feel unwell seek advice from a medical doctor. |
| | | Ingestion | Wash out mouth with water and give plenty of water to drink. Do not induce vomiting. |

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 *

| Document: | SDS 01 |
|-------------|------------|
| Issue No: | 20 |
| Issue Date: | 30.11.2023 |
| Page: | 4 of 12 |

| | | If the person continues to feel unwell seek advice from a medical doctor. |
|--------------------|---------------------|---|
| | Skin Contact: | Drench with large quantities of water. |
| | Okin Contact. | Remove contaminated clothing and place in water to dilute the acid |
| | | Continue to wash the affected area for at least 10 minutes. |
| | | Seek advice from a medical doctor |
| | Eye Contact: | SPEED IS ESSENTIAL - OBTAIN IMMEDIATE MEDICAL ATTENTION |
| | | Immediately irrigate with eyewash solution or clean water for at least 10 minutes, holding |
| | | the eyelids apart. Then take the person to hospital without further delay |
| | Self-protection | Eye protection (safety glasses or face shield), and heavy-duty gloves are required. |
| | for the first aider | In case of inhalation, a face mask or respirator may be required. |
| Case Material | Inhalation: | Material can burn in a fire with toxic smoke and decomposition products. |
| | | Upon inhalation of decomposition products, keep patient calm, remove to fresh air, and |
| | | seek advice from a medical doctor. If a large quantity is inhaled take the person to |
| | | hospital. |
| | | Note to physician: Treat according to symptoms (decontamination, vital functions), no |
| | | known specific antidote. |
| | Ingestion | Wash out mouth with water and give plenty of water to drink. Do not induce vomiting. |
| | nigodion | If the person continues to feel unwell seek advice from a medical doctor. |
| | Skin Contact: | Areas affected by molten material should be quickly placed under cold running water and a |
| | Onun Gomaou | sterile protective dressing applied. |
| | | Seek advice from a medical doctor. |
| | Eve Contact: | May cause irritation or injury due to mechanical action and traces of Battery Electrolyte. |
| | , | Immediately irrigate with eyewash solution or clean water for at least 10 minutes, holding |
| | | the eyelids apart. Then take the person to hospital without further delay |
| | Self-protection | Eye protection (safety glasses or face shield), and disposable gloves are required. |
| | for the first aider | In case of inhalation, a face mask or respirator may be required. |
| Separator Material | Inhalation: | Remove patient from exposure to fresh air. If irritation persists, seek advice from a medical |
| | | doctor |
| | Ingestion | Wash out mouth with water and give plenty of water to drink. Do not induce vomiting. If the |
| | | person continues to feel unwell seek advice from a medical doctor. |
| | Skin Contact: | After contact with skin, wash immediately with plenty of soap and water. If irritation |
| | | persists, seek advice from a medical doctor |
| | Eye Contact: | May cause irritation or injury due to mechanical action and traces of Battery Electrolyte. |
| | | Immediately irrigate with eyewash solution or clean water for at least 10 minutes, holding |
| | | the eyelids apart. Then take the person to hospital without further delay |
| | Self-protection | Eye protection (safety glasses or face shield), and disposable gloves are required. |
| 1 | for the first aider | In case of inhalation, a face mask or respirator may be required. |

SECTION 5: FIRE-FIGHTING AND EXPLOSION HAZARD MEASURES

| <u>olui</u> | | HING AND EXPLOSION | TIAZAND MEASONES |
|-------------|--------------|--|--|
| 5 | VRLA Battery | General Information: Explosion Hazard | VRLA Batteries emit hydrogen gas which is highly flammable and will form explosive mixtures in air from approx. 4% to 76%. This can be ignited by a spark at any voltage, naked flames or other sources of ignition. Batteries in use will be part of an electrical circuit and must be isolated from the power source before attempting to put out a fire. Switch the power OFF before disconnecting the batteries from the power source. Damaged batteries may expose negative plates, grey in colour, which may ignite if allowed to dry out. These plates may be wetted down with water after the battery has been removed from all electrical circuits. |
| 5.1 | | Suitable Extinguisher types: | CO ₂ ; Dry Powder are recommended for electrical fires |
| | | Unsuitable Extinguisher types | Water extinguishers must never be used to put out an electrical fire. |
| 5.2 | | Hazardous combustion & decomposition products: | Carbon monoxide, Sulphur Dioxide, Sulphur Trioxide, Lead fume and vapour, toxic fumes from decomposition of battery case materials. |
| 5.3 | | Advice for fire-fighters | Full face visor or safety goggles; Respiratory equipment or self-contained breathing apparatus (SCBA); Full acid resistant protective clothing must be worn in fire-fighting conditions. |

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 *

| Document: | SDS 01 |
|-------------|------------|
| Issue No: | 20 |
| Issue Date: | 30.11.2023 |
| Page: | 5 of 12 |

SECTION 6: ACCIDENTAL RELEASE MEASURES

This information is of relevance only if the VRLA Battery has suffered damage and is broken.

| Components | | |
|-------------------------------------|---------------------------------------|---|
| VRLA Battery | | VRLA batteries are designed to be safe to handle and not to leak battery electrolyte under normal conditions. In case of accidental damage heavy-duty gloves are required to pick-up the battery to protect against unseen electrolyte leakage |
| Plate Grids and Active Materials | Personal Precautions: | Eye protection (safety glasses or face shield), and heavy-duty gloves are required. If the material is wet, a face mask or respirator is not required If the material is dry, a face mask or respirator is required |
| | Clean-up Methods: | Large, solid pieces may be picked up and bagged for recycling. Never use a brush to sweep up debris; it may create Lead-dust in the air. Wet clean the spill area to remove all traces of debris. Battery debris and cleaning materials must be collected and placed in an inert sealed container (e.g. self-seal plastic bag or bucket) for disposal, see Section 13. |
| | Environmental Precautions: | Do not allow material to enter a watercourse. Exposed Lead materials must placed in an inert sealed container (e.g. self-seal plastic bag or bucket) for disposal, see Section 13. |
| Battery Electrolyte: | Personal Precautions: | Ensure suitable, acid resistant personal protective clothing (including heavyduty gloves, safety glasses and respiratory protection) is worn during removant clean-up of spillages. |
| | Clean-up Methods: Small spillages: | Neutralise and absorb the spillage using soda ash, sodium bicarbonate (available from supermarkets), sodium carbonate or calcium carbonate powder. Wet clean the spill area to remove all traces of debris. Battery debris and cleaning materials must be collected and placed in an inert sealed container (e.g. self-seal plastic bag or bucket) for disposal, see Section 13. |
| | Large spillages: | Large amounts of electrolyte spillage are unlikely with VRLA batteries since electrolyte is fully absorbed in the active materials and separator. Bund the spillage area using dry sand, earth, sawdust or other inert material |
| | | Neutralise the electrolyte using soda ash, sodium bicarbonate (available fror supermarkets), sodium carbonate or calcium carbonate powder. Wet clean the spill area to remove all traces of debris and electrolyte. Cleaning materials must be collected and placed in an inert sealed containe (e.g. self-seal plastic bag or bucket) for disposal, see Section 13. |
| | Environmental Precautions: | Battery electrolyte must not be allowed to enter any drains or sewage syster or water course. |
| Case Material: | Clean-up Methods: | Assume battery case material is contaminated and proceed as for Plate Griand Active Materials above. |
| Separator Material: | Clean-up Methods: | Assume battery case material is contaminated and proceed as for Plate Gri and Active Materials above. |

Note: If appropriate refer to 8 and 13

SECTION 7: HANDLING AND STORAGE

| 7.1 | Component: | | |
|-----|--------------|--|--|
| | VRLA Battery | | Out to in a large to the latter of the large to the large |
| | | Precautions For Safe | Only trained operators should be allowed to handle VRLA batteries. |
| | | Handling: | <u>PPE:</u> No specialist protective clothing or equipment is required, except that for handling heavy weights. |
| | | | Hygiene: There are no specialist requirements beyond good, standard workplace practices, |
| | | Mechanical lifting aides: (epallets of batteries. Weight Mechanical handling aides | Mechanical lifting aides: (e.g. FLT and pallet trucks) will be required to move pallets of batteries. Weight approximately 1 tonne |
| | | | Mechanical handling aides: (e.g. trucks and lifters) will be required to handle individual batteries over 25 kg in weight. |
| | | | General Safety Considerations: |
| | | | Do not drop batteries: dents and deformation of the case may be an indication |
| | | | of internal damage to the battery. Cracks will allow electrolyte to escape. |
| | | | Do not place VRLA Batteries lid-to-lid so that terminals will short-circuit. |
| 7.2 | | Conditions For Safe Storage, Including Any | Store VRLA Batteries in a cool, well-ventilated area with a solid, impervious surface, and adequate containment in the event of accidental acid spillage. |
| | | Incompatibilities: | Store under a roof and protect against direct sunlight and adverse weather conditions including rain, snow and other sources of water. |
| | | | Storage of large quantities of VRLA batteries may require approval from local environmental protection agency and/or local water authorities. |

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 *

| Document: | SDS 01 |
|-------------|------------|
| Issue No: | 20 |
| Issue Date: | 30.11.2023 |
| Page: | 6 of 12 |

| | | Pallets of VRLA Batteries are heavy. Store at ground level or in lower levels of storage systems (e.g. racking). |
|-----|-----------------------|---|
| | | Take special care in dry conditions to avoid the risk of electrostatic discharges. |
| | | Protect against physical damage and exposure to organic solvents and other incompatible materials. |
| | | Do not store VRLA batteries close to sources of heat, naked flames and sparks. |
| | | Store batteries in their original packaging wherever possible. When batteries are removed from their original packaging (e.g. for transportation of small |
| | | quantities), ensure new packaging protects the batteries from damage and the risk of short-circuit of the terminals. |
| | End-of-Life | Ensure batteries are removed from equipment at the end of life and are |
| | (EC WEEE Regulations) | collected for recycling by an approved contractor. |
| 7.3 | Specific End Uses: | Refer to EN IEC 62485-1, Safety requirements for secondary batteries |
| | Installation: | and battery installations. General safety information |
| | | 2. Refer to EN IEC 62485-2, Safety requirements for secondary batteries |
| | | and battery installations. Stationary batteries |

SECTION 8: EXPOSURE CONTROL / PERSONAL PROTECTION

| | Components | | |
|-----|--------------|-----------------------------|--|
| 8.1 | VRLA Battery | Control Parameters: | There are no special control parameters for the handling, storage, installation of VRLA Batteries. VRLA Batteries emit hydrogen gas which is highly flammable and will form explosive mixtures in air from approximately 4% to 76%. Never install VLRA Batteries in a gas-tight enclosure during storage, transport or usage. |
| 8.2 | | Exposure Control: | There are no special exposure controls for the handling, storage, installation or use of VRLA Batteries. |
| 8.3 | | Personal Protection: | When there is no evidence of damage or visible traces of liquid (electrolyte) or solid deposits on the batteries they may be handled safely without extra personal protective equipment. Ensure electrical insulation equipment is used when installing batteries. (e.g. insulated mats and covers; insulated tools) Remove ALL metallic objects from the person when working with VRLA Batteries: e.g. Jewellery (rings, watches, bracelets, necklaces), pens, torches, etc. Where there are signs of damage or liquid (electrolyte) or solid deposits, rubber gloves and acid resistant clothing must be worn when handling the batteries and affected packaging to protect against the effects of any electrolyte that may be present. If it is suspected that free electrolyte is present, then safety glasses must be worn, and if large amounts are present, chemical goggles or face shield should be used. |
| | | UL CAUTIONARY STATEMENT: | "Warning: Risk of fire, explosion, or burns. Do not disassemble; heat above 50°C; or incinerate". |

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

| | Components | | | | |
|--------|---------------------------|-----------------------------------|------------------------|-------------------------------------|---|
| 9.1 | VRLA Battery | The main compo | onents are listed in S | SECTION 2 above. | |
| | | The undamaged | product is a manufa | actured article in an inert plastic | (ABS) case, which will burn if |
| | | subjected to high | n temperatures or so | ources of ignition. Some battery | types are made with Flame Retardant |
| | | ABS cases, see | technical specificati | on. These batteries carry the s | uffix 'FR' after the battery type; e.g. |
| | | NP24-12IFR | | | |
| The in | formation below refers to | the physical and che | emical properties of | the main VRLA Battery compon | ents and substances. This information |
| is pub | ished for reference only. | | | | |
| | Plate Grids and | Appearance | | Safety-related data | |
| | Active materials: | Form | Solid | Solidification point | 327 °C |
| | | Colour | Grey or brown | Boiling point | 1740 °C |
| | | Odour | Odourless | Solubility in water | Very low (0.15mg/l) |
| | | | | Solubility in acid or | Yes, dependant on the strength of |
| | | | | alkaline solutions | solution. |
| | | | | Density (at 20°C) | 11.35 g/cm ³ |
| | | | | Vapour pressure (at 20°C) | Undetectable |
| | Battery Electrolyte: | | | | |
| | | Form | Liquid | Solidification point | -35 to -60 °C |
| | | Colour | Colourless | Boiling point | Approx. 108 to 114 °C |
| | | Odour | Odourless | Solubility in water | Complete |
| | | | | Density (at 20°C) | Variable up to 1.350 g/cm ³ |
| | | | | Vapour pressure (at 20°C) | 10-20 mmHg |
| | | | | | - |
| | | | | | |

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 *

| Document: | SDS 01 |
|-------------|------------|
| Issue No: | 20 |
| Issue Date: | 30.11.2023 |
| Page: | 7 of 12 |

| Case Material: | Appearance | | Safety-related data | |
|---------------------|------------|------------------|------------------------------|---|
| | Form | Solid | Softening point | > 100 °C (DIN 53460) |
| | Colour | Grey or black | Flash Point | >330 °C |
| | Odour | Slight Odour | Solubility in water | Insoluble |
| | | | Solubility in other solvents | Soluble in polar solvents, aromatic solvents, chlorinated hydrocarbons. |
| | | | Density (at 20°C) | 1.07-1.4 g/cm ³ (DIN 53479) |
| | | | Vapour pressure (at 20°C) | Undetectable |
| | | | | |
| Separator Material: | | | | |
| | Form | Fibrous material | Solidification point | 820°C |
| | Colour | White | Boiling point | >2500°C |
| | Odour | Odourless | Solubility in water | Insoluble |
| | | | Density (at 20°C) | 2.23g/cm ³ |
| | | | Vapour pressure (at 20°C) | Undetectable |

SECTION 10: STABILITY AND REACTIVITY

| | Components | | |
|------|-----------------------------------|---|--|
| 10.1 | VRLA Battery | Stability: | Within the operational temperature range -20 to +50 °C the undamaged product is stable. |
| 10.4 | Plate Grids and Active materials: | Materials & Conditions to Avoid: | Powdered Lead reacts violently with fused ammonium nitrate and sodium acetylide. Reacts violently when in contact with chlorine trifluoride. |
| 10.3 | Battery Electrolyte: | Possibility of Hazardous Reactions • Dilution of the higher concentrated grades with water may excessive heat. • Highly reactive with metals and organic materials. • On contact with metals, may generate hydrogen which for explosive mixtures with air. • Destroys organic materials such as cardboard, wood, text • Vigorous reaction with sodium hydroxide and alkalis. | |
| 10.6 | | Hazardous Decomposition Product(s): | Sulphur oxides |
| 10.1 | Case Material: | Materials & Conditions to Avoid: | To avoid thermal decomposition, do not overheat. Starts to decompose at temperatures >275°C. Powerful oxidising agents. |
| 10.6 | | Hazardous decomposition products: | Monomers, other degradation products, traces of hydrogen cyanide. |
| 10.1 | Separator Material: | Stability: | Stable material. |
| 10.4 | | Materials & Conditions to Avoid: | Incompatible with Hydrofluoric acid and concentrated Sodium Hydroxide. |
| 10.6 | | Hazardous decomposition products: | No hazardous polymerisation expected. |

SECTION 11: TOXICOLOGICAL INFORMATION

This information is of relevance only if the VRLA Battery has suffered damage and is broken.

| 1115 11110 | | e only if the VKLA battery has st | differed damage and is broken. |
|------------|--|-----------------------------------|---|
| | Components | | |
| 11 | VRLA Battery | | This information does not apply to the undamaged VRLA Battery. It is of relevance if the battery is broken and the components are released to the environment. Exposure limits may vary according to national law and regulations. |
| 11.1 | Plate Grids: Metallic Lead, Lead alloys. | Acute Toxicity | Toxic by ingestion or inhalation Chronic poison Lead is a poison that affects virtually every system in the body Symptoms include fatigue, headaches, constipation, aching bones and muscles, gastrointestinal tract disturbances and reduced appetite Blood Lead levels of 80 µg/dl and above have been associated with both acute and chronic effects of Lead poisoning |
| | Active materials: Lead dioxide. | Acute Toxicity | Toxic by ingestion or inhalation Chronic poison Chronic exposure to Lead compounds may lead to a build-up of Lead in the body, giving rise to a variety of health problems, including anaemia, kidney and liver damage, impaired eyesight, memory loss and CNS² damage |

² CNS = Central Nervous System

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 *

| Document: | SDS 01 |
|-------------|------------|
| Issue No: | 20 |
| Issue Date: | 30.11.2023 |
| Page: | 8 of 12 |

| | Battery Electrolyte: | Corrosive | Corrosive, the more concentrated solutions can cause serious burns to the mouth, eyes and skin Harmful by ingestion and through skin contact |
|------|----------------------|---------------|--|
| | | Inhalation: | Mist is a severe irritant to the respiratory tract. Fluid build-up on the lung (pulmonary oedema) may occur up to 48 hours after exposure and could prove fatal |
| | | Ingestion: | Will immediately cause severe corrosion of and damage to the gastrointestinal tract |
| 11.1 | Battery Electrolyte: | Skin Contact: | Causes severe chemical burns |
| | | Eye Contact: | Risk of serious damage to eyes. Causes severe burns. May cause prolonged or permanent damage or even total loss of sight. Mist will cause irritation |
| | Case Material: | | According to information available the product is not harmful to health provided it is correctly handled and processed according to the given recommendations. |
| | Separator Material: | | Based on animal implantation and epidemiologic studies glass microfibers are thought to have some limited carcinogenic potential and as such are designated as Group 2B materials (IARC, US). The material should be treated as a category 3 carcinogen (Europe). Limited evidence of carcinogenic effect. |

SECTION 12: ECOLOGICAL INFORMATION

This information is of relevance only if the VRLA Battery has suffered damage and is broken.

| | Components | | |
|------|-----------------------------------|--|--|
| 12.1 | VRLA Battery | | This information does not apply to the undamaged VRLA Battery. It is of relevance if the battery is broken and the components are released to the environment. |
| 12.2 | Plate Grids and Active materials: | Metallic Lead, Lead alloys and Lead dioxide. | Chemical and physical treatment is required for the elimination of Lead from water. Waste water containing Lead must not be disposed of in an untreated condition. |
| | | Ecotoxicity: | Lead metal in massive form is not classified as hazardous to the aquatic environment, due to its low solubility and rapid removal from the water column. Inorganic lead compounds are considered to be acutely toxic in the environment and also to present a long-term hazard to aquatic organisms. |
| | | H Phrase H400 &410 | |

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 *

| Document: | SDS 01 |
|-------------|------------|
| Issue No: | 20 |
| Issue Date: | 30.11.2023 |
| Page: | 9 of 12 |

| | | Effect in the aquatic environment: | Toxicity for fish: 96 h LC 50 > 100 mg/l Toxicity for daphnia: 48 h EC 50 > 100 mg/l Toxicity for alga: 72 h IC 50 > 10 mg/l | | |
|--|---------------------|------------------------------------|---|--|--|
| 12.3 Battery Electrolyte: Ecotoxicity: | | * | In order to avoid damage to the sewerage system, the acid has to be neutralised by means of soda ash, sodium bicarbonate or sodium carbonate before disposal. Ecological damage is possible by change of pH. The electrolyte solution reacts with water and organic substances, causing damage to flora and fauna. The electrolyte may also contain components of Lead that can be toxic to aquatic environments. | | |
| | | Persistence and Degradation: | Remains indefinitely in the environment as sulphate. | | |
| 12.4 Case Material: Elimination inform | | Elimination information: | No data available: insoluble in water | | |
| | | Behaviour and environmental fate: | Due to the consistency of the product, and its insolubility in water, it will apparently not be bio-available. | | |
| 12.5 | Separator Material: | | No data available: insoluble in water | | |
| | | | Not thought to pose any risk to the environment. | | |

SECTION 13: DISPOSAL CONSIDERATIONS

| | Components | CONSIDERATIONS | |
|------|-----------------------------------|----------------------|--|
| 13.1 | VRLA Battery | Europe: | Spent (used) VRLA Batteries are subject to the requirements of the Batteries Directive 2006/66/EC on batteries and accumulators and waste batteries and accumulators. Spent (used) VRLA Batteries MUST be sent for recycling through an authorised contractor at the end-of-life. The WEEE Directive 2002/96/EC (Waste Electrical and Electronic Equipment) applies. Spent (used) VRLA Batteries MUST be removed from electrical and electronic equipment at the end-of-life. |
| | | Worldwide: | VRLA batteries contain inorganic Lead compounds and Sulphuric Acid which are damaging to the environment. Spent (used) batteries must be disposed of in an environmentally friendly manner in accordance with local national laws and regulations. |
| | | | VRLA batteries must not be dismantled, burnt or incinerated as a means of disposal. At the end of life VRLA batteries may still be electrically 'live' and contain a large amount of electrical energy. The same care and attention to safe handling should be taken as when handling new batteries. Particular care must be taken to avoid short-circuiting the battery terminals. |
| 13.2 | Plate Grids and Active materials: | Europe Worldwide | Metallic Lead and active materials (Lead Oxides) must be recycled. Disposal must be carried out in accordance with the European Hazardous Waste Directive 2008/98/EC |
| 13.3 | Battery Electrolyte: | Europe | Disposal must be carried out in accordance with the European Hazardous Waste Directive 2008/98/EC on the protection of the environment through criminal law |
| | | Worldwide General | Disposal should be in accordance with local, state or national legislation. Battery electrolyte is dilute Sulphuric Acid, the strength of which depends on the state of charge of the batteries. It must be neutralised before disposal. See SECTION 6 for clean-up and disposal advice. |
| 13.3 | Case Material: | | Do not dispose of this product into sewers, any ocean or water course in order to prevent marine animals and birds from ingesting. Recycling is encouraged. Disposal by controlled incineration or source landfill in accordance with local national laws and regulations may be acceptable. |
| 13.4 | Separator Material: | | Constitutes a special waste by virtue of hazardous substance content. Dispose of via approved landfill site. Disposal by controlled source landfill in accordance with local national laws and regulations may be acceptable. |

16 Further (f) Information

To ensure the safe use of VRLA Industrial Batteries supplied by GS **YUASA**, the following precautions must be observed:

- Warning: Risk of fire, explosion, or burns. Do not disassemble, heat above 50°C, or incinerate.
- Never short-circuit battery terminals, since sparks and arcs produced can injure personnel and are a fire and explosion hazard.
- Batteries must always be charged on a voltage-regulated charging system with adequate ventilation provided to avoid the build-up of ignitable gases and to promote good heat dissipation.
- Do not charge VRLA Batteries above + 50 °C, discharge or store above + 60 °C.
- Under extreme conditions of charging equipment malfunction and/or battery failure, high voltage and high temperature conditions may occur causing the evolution of Hydrogen Sulphide (H₂S) gas, which is toxic. If detected by its odour of rotten eggs (at extremely low concentrations), switch off the charging equipment, evacuate all personnel from the area and ventilate well. Seek advice before attempting to re-start charging
- NEVER PLACE VRLA BATTERIES INSIDE SEALED OR GAS-TIGHT ENCLOSURES DURING OPERATION, TRANSPORT AND STORAGE

VRLA Batteries emit hydrogen gas which is highly flammable and will form explosive mixtures in air from approximately 4% to 76%. This can be ignited by a spark at any voltage, naked flames or other sources of ignition

This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product
