SIEMENS

product type designation	IWLAN mounting aid for antenna ANT795-6MN
product description	Fastening ring for ceiling mounting of ANT795-6MN incl. 1 angle plug

Mounting kit for ANT795-6MN Mounting aid for installation of ANT795-6MN below roof, IP20 (-40-+70 °C), Scope of delivery: 1 mounting aid 1 elbow adapter N-Connect male/female 2 fixing screws Compact instructions as hard copy German/English.

electrical data
number of electrical connections	2
type of electrical connection	N-Connect male/ N-Connect female
transmission frequency	0 ... 6 GHz
impedance	50 Ω

ambient conditions
ambient temperature	
● during operation	-40 ... +80 °C
● during storage	-40 ... +80 °C
● during transport	-40 ... +80 °C
protection class IP	IP20

design, dimensions and weights
diameter	105 mm
length	49 mm
net weight	30 g

standards, specifications, approvals
certificate of suitability	
● RoHS conformity	Yes
reference code	
● according to IEC 81346-2:2019	UQB

Security information
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or

network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
